

Global Plastic Waste

Recent statistics indicate that plastic waste is approximately 30% of all waste produced worldwide.

The world generated **242 million tonnes** of plastic waste, 12% of all municipal solid waste.

Ocean plastics are a huge environmental issue...

But are fish eating these plastics?

Yes!

Fish in both Australia and Fiji had microplastics in their gut

The types of plastic were different in each country

Fiji had more film, from plastic bags

Australia had more filaments, from synthetic clothing

MARINE & OCEAN POLLUTION
