

STUDENT SNAPSHOT

Name (Pseudonym): Rahul Kumar

Class / Grade: Class 8

Age: 13 Years

School Type: Government High School

Location: Vijayawada, Andhra Pradesh

Language Comfort: Telugu, English

Devices Used: Mobile Phone, School Computer

ABOUT ME

- I enjoy playing educational games and quizzes.
- Science is one of my favorite subjects.
- I like learning through pictures, animations, and activities.
- I often use my mobile phone for studying and entertainment.

LEARNING CONTEXT

- I learn better when concepts are explained visually.
- I find practical examples easier than textbook theory.
- I study mostly after school and during weekends.
- Teachers and parents help me when I face difficulties.

GOALS & DREAMS

- Score good marks in Science examinations.
- Understand the difference between metals and non-metals clearly.
- Improve my scientific knowledge and curiosity.
- Become an engineer or scientist in the future.

CHALLENGES & PAIN POINTS

- Scientific properties are difficult to memorize.
- Text-heavy lessons become boring quickly.
- Sometimes I confuse metals and non-metals.
- Lack of interactive learning makes concepts harder to understand.

NEEDS & EXPECTATIONS

- Interactive quizzes and activities.
- Visual examples of metals and non-metals.
- Simple explanations with instant feedback.
- Rewards, badges, and progress tracking.

MOTIVATIONS

- Earning points, badges, and certificates.
- Learning through fun challenges and games.
- Competing with friends on scores.
- Receiving appreciation from teachers and parents.

TECHNOLOGY COMFORT

Level: Confident 

- Uses mobile applications regularly.
- Comfortable with educational websites and games.
- Can navigate simple digital learning platforms independently.

QUOTES & INSIGHTS

"I understand science better when I can see and interact with examples."

"Games make learning more interesting than reading long paragraphs."

"I like getting instant feedback when I answer questions."

A DAY IN MY LIFE

Attend school from morning to afternoon.

Complete homework after returning home.

Spend some time using mobile apps and watching educational videos.

Revise lessons before exams and participate in quizzes.

ADDITIONAL NOTES

- Prefers colorful and engaging learning experiences.
- Learns faster through interaction than memorization.
- Benefits from simple language and clear visual explanations.
- Ideal user for the Metal vs Non-Metal Challenge educational game.
