

BRIDGING THE DIGITAL GAP – THINK LIKE A SCHOOL STUDENT

Hi, I'm Ravi!
I am 11 years old.
I study in Class 6
in a rural government
school. I love drawing,
science activities and
learning through videos
or games.

① WHO IS THE STUDENT?

- Telugu-medium student
- No personal smartphone
- Government school
- Shy to ask doubts

② WHAT DOES THE STUDENT FEEL?

Confused in English class

Teacher speaks too fast...

Sad when unable to understand

I don't understand English words.

Bored during long lectures

I wish learning was fun.

Excited during activity-based learning

I learn better with pictures and videos.

③ WHAT STRUGGLES DOES HE FACE?

④ WHERE IS THE DIGITAL GAP?

BEFORE (DIGITAL GAP)

- ✗ No devices
- ✗ No digital access
- ✗ Students confused and sleepy
- ✗ Only textbook learning

AFTER (BRIDGED GAP)

- ✓ Shared smart classroom
- ✓ Interactive projector/videos
- ✓ Telugu explanations
- ✓ Students smiling and participating

⑤ WHAT EXCITES THE STUDENT?

Fun learning

Visual explanations

Interactive games

Learning in Telugu

⑥ HMW QUESTION

How might we help rural Telugu-medium students learn difficult subjects in a fun and visual way even without personal digital devices?

⑦ FINAL ROUGH IDEA SKETCH – SMART LEARNING CORNER

SMART LEARNING CORNER

- Shared projector/tablet
- Offline Telugu learning videos
- Picture-based lessons
- Group quiz activities

జల చక్రం (Water Cycle)

LET'S LEARN TOGETHER!

GROUP QUIZ TIME!

Q: నది ఎక్కడ నుండి వస్తుంది?

A) నమిస్తం
B) కొండలు
C) చెరువు

**Together we learn,
Together we grow,
Together we bridge
the digital gap!**

Title : Bridging the Digital Gap – Think Like a School Student

Problem Statement :

Many rural government school students struggle to learn because they do not have proper digital access, personal devices, or engaging learning methods.

Students like Ravi, a Class 6 Telugu-medium student, often share textbooks, face language barriers, feel shy to ask doubts, and experience boring classroom teaching without visual or interactive learning.

The digital gap creates confusion, low confidence, fear of difficult subjects like English and Maths, and reduced interest in studies.

There is a need to make learning simple, fun, visual, and accessible for students even without personal smartphones or laptops.

Solution :

A shared digital learning space inside the classroom that helps students learn through:

- Offline Telugu learning videos
- Shared projector/tablet
- Picture-based explanations
- Interactive quiz games
- Group learning activities
- Science experiments and visual storytelling

This solution can:

- Increase student interest and confidence
- Reduce fear of asking doubts
- Make difficult subjects easier to understand
- Encourage participation and teamwork
- Bridge the digital gap in rural schools
